

JT Tutor

(662)-873-7390 | jttutor10@gmail.com | Pontotoc, MS

Summary

Full stack developer and graduate of Base Camp Coding Academy, where I completed an intensive year-long program covering nine languages and frameworks on a full scholarship. I previously gained hands-on experience developing Salesforce/Apex solutions during an internship at C Spire, and I'm currently working as a Software Engineer Intern at Edge Theory, contributing to a variety of projects. I'm also finishing up my Associate's Degree in Coding Technology at Northwest Mississippi Community College. I'm looking to grow with a company where I can keep building real-world skills and make a genuine impact.

Experience

Software Engineer Intern | 06/2026 - Present | EdgeTheory | Oxford, MS (Remote)

Used a Ruby API to create an endpoint for automating meeting session schedules, streamlining intern timesheets.

Customer Applications Intern | 06/2026 - 08/2026 | C Spire | Ridgeland, MS

Salesforce administration and development. Created "Health Check" LWCs for objects to increase incident creation and resolution speeds.

Shift Leader/Cashier | 12/2023 - 05/2026 | Zaxby's | Pontotoc, MS

Grew my position from entry-level cashier to shift leader within 18 months. As a shift leader, I managed high-pressure environments and coordinated team tasks to ensure efficient service delivery.

Education

AAS in Coding Technology | Northwest Mississippi Community College | 12/2026 | Senatobia, MS
